## What is Nestage

Nestage is a new era of decentralized finance where **staking** meets **networking**. The rise of blockchain technology has paved the way for innovative platforms like Nestage, solving the most common problem with De-Fi staking which is the **returns being all over the place**(variable returns). Nestage empowers users with fixed returns on staking, a decentralized referral matrix for network expansion, and plans to integrate a **utility token** to enrich its ecosystem.

**+Vision:** Nestage is all about **Simplicity** and **Stability**. We want to create a sustainable, transparent, and community-driven financial platform where users can maximize their income potential through innovative blockchain solutions.

# The Challenges in DeFi Staking:

- Low & Volatile Returns: Traditional staking pools on decentralized wallets and centralized exchanges often have variable interest rates, leading to unpredictable earnings.
- Limited User Engagement: Most platforms offer only staking, missing opportunities for community-driven growth or additional user engagement mechanisms.
- **Complexity:** The DeFi space can be complex and overwhelming for new users, limiting mainstream adoption.

\_\_\_

### **Solution Overview**

**Nestage**, built on the BSC network is a decentralized platform that integrates **DeFi staking** and a **3-level matrix**, offering a unique combination of:

- 1. **Fixed 30% Staking Returns in 25 days:** Stable, predictable returns that stand out from traditional, volatile staking pools.
- 2. **Community-Driven Growth:** Users can **earn additional rewards** by referring others, leveraging a **decentralized matrix** model that builds network effect and long-term engagement.
- 3. **Accessible for All:** Simplified onboarding, intuitive UX/UI, make DeFi accessible to both seasoned crypto users and newcomers.

\_\_\_

### The DeFi Opportunity

The global DeFi market continues to grow exponentially, with Total Value Locked (TVL) exceeding **\$700 billion** across DeFi protocols. However, despite this rapid expansion:

- User adoption is still under 40% of the global crypto market.
- There is a gap for **platforms offering both staking and additional revenue streams** through referral models.
- Early DeFi users have accrued large profits, but the market has yet to see a mass adoption platform that simplifies onboarding for a general audience while maintaining high returns.

\_\_\_

# **Blockchain Technology and Smart Contracts**

Smart contracts are self-executing agreements encoded in code and stored on blockchain networks, enabling automated transactions.

They run on decentralized networks, eliminating the need for intermediaries and ensuring transparency. With predefined rules, smart contracts automatically execute actions when conditions are met, streamlining processes and reducing errors.

This automation also cuts costs by bypassing traditional intermediaries, making transactions more efficient.

To become a Nestage member, you need a personal crypto wallet.

Only you have access to the funds. All rewards are instantly credited to your personal wallet.

\_\_\_

# Why is Nestage better than its peers

- Fixed returns, unlike traditional variable-rate staking pools.
- A community-focused approach ensuring long-term sustainability.
- Nestage has a program suitable for everyone...Whether you're looking to earn passive income through partners or seeking smart Staking opportunities.
- Nestage Participants do not have accounts within the system from which to withdraw funds, since Nestage does not store your assets, all earnings are directly to participants wallet and no need to withdraw from the platform
- Blockchain Security: Our platform leverages the power of blockchain to ensure secure transactions and transparent earnings for all users.
- User-Friendly Interface: Navigate Nestage's intuitive platform with ease, from signing up and referring friends to managing your Stakings and tracking your progress.

# **Nestage Ecosystem Overview**

Layer 1 ⇒ Nestage DeFi Staking

Users stake stablecoin(BUSD) and earn a fixed 30% return after 25 days.

Nestage generates up to 30% interest on your stake(35% on the \$NST Token) after 25 days.

### Minimum stake is 10 BUSD

#### NOTE:

- -This layer is completely independent and does not rely on the layer 2 matrix to function.
- -At the end of your Staking cycle, your earnings are automatically transferred into your personal wallet.
- -You earn 10x value of your stake amount in **NST points** every time you stake
- -You will not be able to register a partner if you are on this layer as your referral link is only generated when you activate layer 2.

## How to earn on the layer 1

- ⇒Simply head over to the site, connect your wallet
- ⇒Input your stake amount(Minimum of 10 BUSD), approve transaction
- ⇒You receive 30% + your stake after 25 days of staking.

### Advantages of the Nestage De-Fi Staking

- Affordable and easy start
- Instant transaction
- Zero effort required
- Very low network fee

# layer 2 ⇒ Nestage Decentralized Matrix

For this layer, every Nestage participant is considered equal.

Nestage's decentralized matrix is an additional earning structure that allows participants to earn rewards from their direct partners, second-level partners, third-level partners, and overflows.

It is a structure based on the activities and growth of your network. By actively engaging your community and leveraging the referral system, you can maximize your earnings and build a sustainable income stream within the Nestage platform.

Upon sign up you get a unique referral link. Share your unique referral link with friends, family, or your audience. Earn rewards for every new user who joins through your link.

## How to earn on Nestage Affiliate

This layer offers an efficient 3 level matrix system demonstrated below; Imagine three levels of friends:

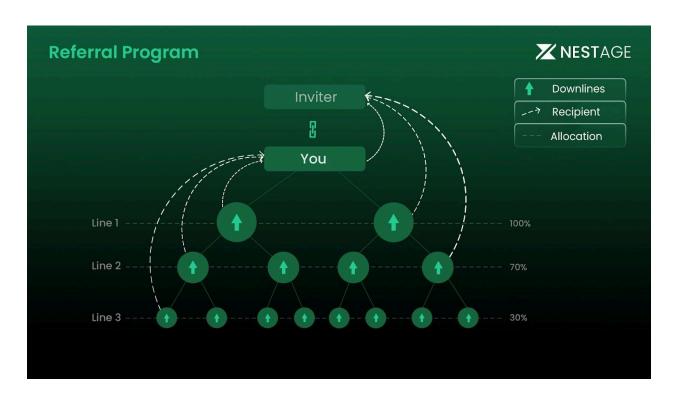

- 1. **Level 1**: These are the people you directly invite (your personal partners).
- 2. **Level 2**: These are the people your Level 1 friends invite.
- 3. **Level 3**: These are the people invited by your Level 2 friends.

You earn rewards from the actions of all three levels. The more people in your network, the more rewards you can earn.

# Overflows are earnings from your uplines activities in the program

You have the potential to cease working and still generate substantial income from your engaged community.

## • layer 2 Earning structure

- +You earn 2 BUSD and also 1000 NST Points for your direct partners
  +You earn 1.5 BUSD and 1000 NST Points for your level 2 partners
- +You earn 1 BUSD and 1000 NST Points for your level 3 partners

### Activation fee is 5 BUSD.

### **Notes**

- ⇒layer 1 and 2 are two independent layers, i.e you may participate in one without the other.
- ⇒For this layer, you earn 10% of your partners stake even when they activate only their layer 1
- ⇒The full layer 2 profits are earned when your partners activate their layer 2

### Advantages of Nestage Affiliate

- There are no limits to how much you can earn/refer
- You earn from your team forever
- Instant transactions from one wallet to another
- Very low network fee

# The Nestage token (\$NST)

As Nestage grows and attracts a larger community, we plan to introduce our proprietary token, the **Nestage Token (NST)**, to power the platform's ecosystem. NST will act as a utility token, providing more flexibility and incentives for both staking and referral activities. This token will further enhance user engagement, create new earning opportunities, and drive long-term value for the platform and its community.

The NST token will be airdropped to current users of the Nestage platform; which will be earned in the form of NST points as they use the platform and then converted to the main token after launch

### We want to reach a milestone of 50,000 active users before launching

### **\$NST** earning structure:

- => 5,000 points for registering on each layer(10,000 points for both layer)
- => 1000 points for every Level 1 partners you invite(to either layer 1 or 2)
- => 1000 points for every level 2 partners you invite
- => 1000 points for every level 3 partners you invite
- => 10x your stake amount in NST points every time you stake
- => 10,000 points every time you refer 10 new users
- => 1000 points for completing tasks

Nestage currently offers a 30% profit on every stake in BUSD, after the launch of the NST token, profit percent goes to 35%. This means that staking with the NST token will now generate 35% profit after 25 days

# How to Register on Nestage

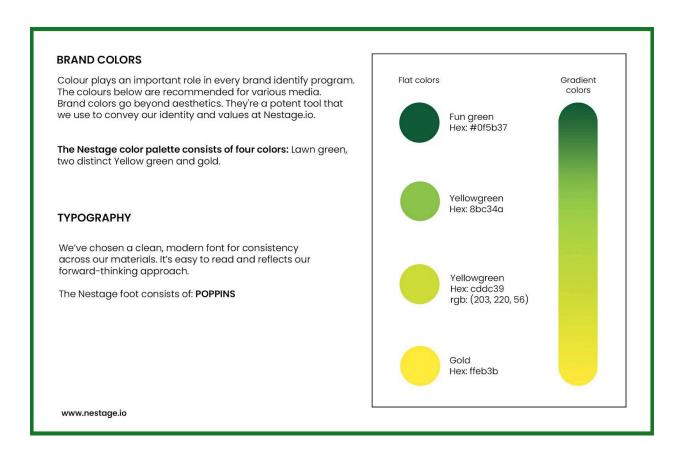

- ⇒Download a decentralized crypto wallet like Trust wallet, Metamask (recommended)
- ⇒Create your crypto wallet account and make sure to keep your secret phrase secured and backed up
- ⇒Fund your **BUSD(BSC)** wallet with any amount more than or equal to **10 or 5 BUSD(**depending on your preferred layer**)** through Binance, coinbase, or a trusted local exchanger.
- ⇒Now to go the Dapp browser on the wallet and head to www.Nestage.io and connect wallet
- ⇒Select your layer and approve the transaction. **Note** that You need a little BNB to cover gas fee

- ⇒Make sure your upline's ID is correctly inputted as you won't be able to modify after registration
- ⇒Click register and start to earn.

## Nestage Marketing and promotion

Create compelling and top-notch content across a range of platforms including blogs, social media, videos, infographics, and podcasts to captivate and maintain your audience's interest.
